# OKEKE DIVINE-VESSEL

## Fullstack Web Developer

## PROFESSIONAL SUMMARY

Results-oriented Full Stack Web Developer with 7+ years of experience building user-friendly and scalable web applications. Successfully designed, developed, and deployed over 18 web applications using technologies like [React, NextJs, Django, PHP, MySQL, PostgreSQL]

## WORK EXPERIENCE

### Marokug

AUG 2023 - APR 2024

Full Stack Web Developer

- Developed the back-end infrastructure for a new interactive assessment system, enabling efficient evaluation of student learning outcomes.
- Collaborated with UI/UX designers to convert the education platform UI to a more user-friendly and engaging interface, leading to a significant increase in student course completion rates.
- Maintained and scaled the company's database to ensure smooth operation and accommodate a growing user base.
- Created a gamified learning experience by integrating points, badges, and leaderboards, resulting in a 15% boost in student participation and interaction.

### Jujora

MAR 2024 - PRESENT

Lead Frontend Web Developer (**Part Time Contract**)

- Collaborated with the UI/UX team to refine the e-commerce platform's user interface, ensuring an intuitive and user-friendly experience for both farmers and consumers.
- Worked closely with back-end developers to integrate a secure payment gateway, enabling seamless online transactions for Jujora's customers.
- Utilized Git for version control and collaboration, streamlining the development process and ensuring efficient teamwork within the project

- English (Professional)

## PROJECTS

### Marokug (Online Learning Platform)

<https://marokug.vercel.app>

- Collaborated with a cross-functional team to develop an interactive learning platform.
- Empowered students with flexible course exploration, interactive quizzes, and additional learning resources.
- Technologies used: React, Tailwind, Django, MySQL.

### Strender (Sports Web App)

<https://strender.vercel.app/home>

- Created a comprehensive sports hub offering news, scores, and highlights across various sports.
- Implemented anonymous commenting features for enhanced engagement.
- Technologies used: React, Tailwind, Django, PostgreSQL.

### Beat Website (for Prod. Kayks)

<https://prodkayks.vercel.app>

- Crafted a dynamic beat website showcasing a music producer's creations.
- Provided a seamless platform for beat/mashup discovery with elegant design and user-friendly features.
- Technologies used: Next.js, Tailwind, PostgreSQL.

### Jujora (E-commerce App)

<https://jujora.vercel.app>

- Developed an e-commerce application connecting farmers directly with buyers.
- Enabled transparent food supply chains and support for local farmers.
- Technologies used: Next.js, Tailwind, PostgreSQL.

### Geegpay (Frontend Challenge)

<https://okeke-divine.github.io/Geegpay-Front-End-Challenge/>

- Successfully converted a Figma dashboard design to HTML, ensuring pixel-perfect results.
- Implemented clean and semantic HTML code with responsiveness and accessibility in mind.
- Technologies used: HTML, CSS, JavaScript, ChartJs.

### Mtalers (Educational Blog)

- Developed a comprehensive educational blog for a client.
- Enhanced learning experiences through user-friendly interfaces and interactive content.
- Technologies used: jQuery, PHP, MySQL
